A majority of psychiatrists now see increasingly complex, dual or triple-diagnosis patients, who take multiple psychiatric medications, and have varying degrees of treatment resistance. The symposium is designed to update clinicians on the current standards of practice, drawing significantly on the APA Practice Guidelines and the considerable experience of our clinically faculty members who regularly treat complex cases. Symposia topics will cover psychiatric drug development, standards of care, assessment and management, and a variety of emerging issues including: bipolar disorder, schizophrenia, substance abuse, depression, treatment-resistant depression, treatment, and effective management of a psychiatrists practice.

Unique Bilingual Spanish and English CME Program

MASTERS OF PSYCHIATRY:
TREating COMPLEX CASES

NEW! All Spanish Symposium
Friday January 23, 2009

On Saturday, January 24, 2009, all lectures will be given only in English.

MAJORITY OF PSYCHIATRISTS NOW SEE INCREASINGLY COMPLEX, DUAL OR TRIPLE-DIAGNOSIS PATIENTS, WHO TAKE MULTIPLE PSYCHIATRIC MEDICATIONS, AND HAVE VARYING DEGREES OF TREATMENT RESISTANCE. HIS COURSE IS DESIGNED TO UPDATE CLINICIANS ON THE CURRENT STANDARDS OF PRACTICE, DRAWING SIGNIFICANTLY ON THE APA PRACTICE GUIDELINES AND THE CONSIDERABLE EXPERIENCE OF OUR CLINICAL FACULTY MEMBERS WHO REGULARLY TREAT COMPLEX CASES. SYMPOSIUM TOPICS WILL COVER PSYCHIATRIC DISORDERS AND STANDARDS OF PRACTICE, AS WELL AS A VARIETY OF EMERGING ISSUES IN BASIC SCIENCE RESEARCH ON PSYCHOPHARMACOLOGY, TREATMENT, PSYCHIATRIC MANAGEMENT OF PATIENTS IN INBETTER ORDER, AND EFFECTIVE MANAGEMENT OF A PSYCHIATRIC PRACTICE.

January 23-24, 2009
The Alexander All-Suite Oceanfront Resort
Miami Beach, Florida
Message from Dr. Julio Licinio

Dear Colleagues,

Improving the lives of those suffering from psychiatric and behavioral disorders is at the very heart of our mission. We, the faculty and staff of the Department of Psychiatry and Behavioral Sciences at the University of Miami Miller School of Medicine, have a research portfolio of over $27 million, clinical practices that treat over 50,000 patients per year, and a medical education program from which some of the top psychiatric leaders in our country graduate. Through our innovative research on biology, behavior, brain and mind, we can unlock the mysteries of mental illness and improve outcomes for patients.

According to the National Institute of Mental Health, approximately 1 in 4 people are affected with a mental disorder and 1 in 17 suffers from a serious mental illness. Furthermore, many who receive such a diagnosis also suffer from more than one disorder at a time. Diseases and disorders of the mind affect not only one’s health and sense of wellbeing but also the lives of family, friends. Advances in science have equipped our experts in the field with tools to effectively investigate mental illness and search for better treatment, prevention and cures.

The unique mission of the kind, bilingual, two-day continuing medical education conference will provide novel insights for psychiatrists, psychologists, family-practice physicians, clinical social workers, therapists, nurses, and pharmacists. It is an opportunity for all groups to discuss issues of common interest.

I encourage you to attend this valuable educational experience and enjoy South Florida. I look forward to seeing you in Miami. For more information on our department and our new initiatives, please visit http://psychiatry.med.miami.edu/

Sincerely,

Julio Licinio, M.D.

University of Miami Leonard M. Miller School of Medicine

University of Miami Hospital
1600 NW 12th Avenue
Miami, FL 33101

The centerpiece of the new University of Miami Health System is the University of Miami Hospital, with 560 beds, 13 floors, and 1.5 million square feet of space. Formerly known as Cedars Medical Center, the University of Miami Hospital has patient beds on nine floors, starting on the 15th floor and ending on the penthouse. Each of the 560 beds is a private room, including its 16 psychiatry beds. This is the largest private-sector equivalent facility for acute psychiatry in the state of Florida.

Course Objectives
User-completion of the course, participants will be able to:

1. Recognize the most current standards of practice as pertains to the screening, diagnosis, and management of psychiatric disorders
2. Determine and manage the psychiatric needs of adults, adolescents, and geriatric patients
3. Recognize the most current standards of practice for the treatment ofชาย, nervous disorders, including bipolar disorders and major depressive disorders in mentally impaired and geriatric patients and their families
4. Determine and manage the psychiatric needs of adolescents, and geriatric patients
5. Address the needs of patients with substance abuse, psychotic, and bipolar psychiatric
6. Recognize the most current standards of practice for the treatment of children, adolescents, and their families
7. Recognize the most current standards of practice for the treatment of children, adolescents, and their families
8. Determine and manage the psychiatric needs of patients
9. Recognize the most current standards of practice for the treatment of children, adolescents, and their families
10. Recognize the most current standards of practice for the treatment of children, adolescents, and their families

Target Audience
This course is designed for psychiatrists, psychologists, family-practice physicians, clinical social workers, therapists, nurses, and pharmacists.

Accreditation
The University of Miami Leonard M. Miller School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing education for physicians.

Credit Designation
The University of Miami Leonard M. Miller School of Medicine designates this educational activity for a maximum of 8 AMA PRA Category 1 Credit(s)™. Full credit will be awarded with the active participation in the activity.

Psychology Continuing Education
The University of Miami Leonard M. Miller School of Medicine is in compliance with the Florida Psychological Association (FPA) to sponsor continuing education for psychologists. For the University of Miami Leonard School of Medicine, the activity is designated for a maximum of 13.5 AMA PRA Category 1 Credits™. Full credit will be awarded with the active participation in the activity.

Disclosure and Conflict of Interest Resolution
All faculty members for this educational activity are required to disclose any potential conflicts of interest related to this conference. In compliance with the Accreditation Council for Continuing Medical Education (ACCME) guidelines, any unreported conflicts of interest will be presented to the audience at the conclusion of the activity.

For More Information, Please Contact:
Division of Continuing Medical Education

Masters of Psychiatry Program Registration

January 23-24, 2009

Miami Beach, Florida

For the first time, the Department of Psychiatry and Behavioral Sciences at the University of Miami School of Medicine will offer a two-day CME symposium, presented in both English and Spanish. The Symposium will offer an innovative and unique bi-lingual educational experience for all physicians who regularly treat complex cases.

Todays psychiatrists face the challenge of how to effectively manage all patients, regardless of the severity or complexity of their illness. Many of these patients have varying degrees of treatment resistance, as they see increasingly complex, dual- or triple-diagnoses patients, who take multiple psychiatric medications, and see patients with HIV/AIDS. This course is designed to update clinicians on the current guidelines in treating these patients.

This program is designed to:  
- Increase awareness and understanding of the complex issues in treating patients with psychiatric disorders and substance abuse.
- Update clinicians on the current guidelines in treating these patients.
- Provide the necessary knowledge to treat a diverse group of patients.

Symposia topics will cover psychiatric practice guidelines and the considerable experience of our clinical faculty members who regularly treat complex cases. Faculty members will share evidence-based approaches to treatment, psychiatric management of patients with HIV/AIDS, and effective management of a psychiatric practice.

Payment Method: Checks should be made payable to Psychiatry and Behavioral Sciences (D-21) and mailed to:

Psychiatry and Behavioral Sciences
Department of Medicine
1120 NW 14th Street, Room 1434 (D-21)
Miami, Florida 33136

The Alexander All-Suite Oceanfront Resort
5225 Collins Avenue
Miami Beach, FL 33140

Tel: 305-865-6500 /1-800-327-6121
Fax: 305-341-6554

Hotel Information:
The Alexander All-Suite Oceanfront Resort is an intimate and exclusive beachfront property offering luxury all-suite accommodations, two lego-shaped pools, poolside cabanas and Shula's Steak House, recognized as one of the top five steak houses in the country.

A majority of psychiatrists now see extremely complex, dual-diagnosed patients, with multiple psychiatric medications, and those requiring degrees of specialization in order to adequately treat them. In an attempt to educate our readers to the current knowledge of this treatment, this Symposium will cover psychiatry, internal medicine, and infectious diseases, and those in-between.

In addition, attendees will learn about emerging issues in basic science topics relevant to psychiatry, detoxification and the considerable experience of our clinical faculty members who regularly treat complex cases. Faculty members will share evidence-based approaches to treatment, psychiatric management of patients with HIV/AIDS, and effective management of a psychiatric practice.
